Address: Koto City, Tokyo, Japan

SUMMARY

Accomplished software developer with 13+ years of experience across various industries, including banking, payment, e-commerce, tourism, and traditional games. Proficient in numerous programming languages, such as Java, Python, Golang, TypeScript, JavaScript, HTML5, and CSS, and a strong background in algorithms and data structure. Dedicated to staying current with emerging technologies and best practices. Currently developing SAAS systems for a Tokyo-based company.

SKILLS:

Skill	Years		Skills	Years
Java	11		Spring boot/spring	7
Golang	3		NestJs/expressJs/ koa.js	5
JavaScript	11		Angular/React/Vue	5
TypeScript	6		Html5/Css.x	5
Oracle/ MySQL/Redis/ cosmos DB	5		Agile	3
Docker	5		Azure	1.5
Linux	8		Gitlab	8
Python	3			

EXPERIENCE

Contract Senior Engineer | Nomura Security | Tokyo, Japan | June 2022 - Present

Responsibilities:

- Support colleagues in resolving technical issues and addressing business inquiries
- Execute project technology implementation
- Aid in solving complex problems, project integration, and publishing

Technology stack:

- Utilized TypeScript, Python, SQL Server, Node.js, and Angular14
- Frameworks/library used: Nestjs, Python batch, Angular 14

Achievements:

- Successfully implemented agile development using GitLab, delivering monthly tasks on time
- Tackled the unique challenge of interpreting business requirements expressed in mathematical symbols
- Participated in a highly diverse, international team with members from different countries and cultures

Business:

- Securities and Investment Banking

Contract Senior Java Engineer | Nisshin | Tokyo, Japan | January 2021 - June 2022

Responsibilities:

- Assist colleagues in resolving technical issues and addressing business inquiries
- Implement project technology, design stress tests, and underlying implementation
- Aid in solving complex problems, project integration, and publishing

Technology stack:

- Utilized Java, TypeScript, Golang, and CosmosDB
- Frameworks/library used: Javalin, K6, go frame

Achievements:

- Delivered SAAS module development tasks on time, based on agile development backlog
- Adapted to a Japanese work environment, overcoming language and cultural barriers
- Enhanced code readability and conciseness while working on SAAS architecture projects for the first time

Business:

- Cloud-based HR Solutions

Contract Technical Leader | HSBC Bank | Guangzhou, China | February 2019 - June 2021

Responsibilities:

- Plan project implementation and technical selection
- Resolve technical issues and communicate business requirements
- Report to CTO and delegate tasks to subordinates
- Assist others in solving complex problems

Technology stack:

- Utilized Java, TypeScript, Golang, Oracle, MySQL, and Node.js
- Frameworks/library used: Springboot, Mybatis, React

Achievements:

- Delivered relevant project requirements on time
- Entered the financial industry and adopted

JIRA-based agile development for the first time

- Assumed the role of technical director for an international company, enhancing technical leadership skills

Business:

- Investment Banking

Permanent Technical Leader | SurLead | Manila, the Philippines | May 2015 - February 2019

Responsibilities:

- Communicate business needs and project planning
- Implement project version updates and iterative maintenance
- Report to the CTO and delegate tasks to subordinates
- Assist others in solving complex problems

Technology stack:

- Utilized Java, TypeScript, Oracle, MySQL, and Node.js

- Frameworks/library used: Springboot, Mybatis, Reactjs, Angularjs, Vuejs, Nestjs, Expressjs

Achievements:

- First-time full responsibility for end-to-end project management, including backend and frontend projects
- Improved understanding and implementation of entire software engineering process through technology selection, architecture design, underlying technology design, business communication, and task delegation

Business:

- Software Development, Insourcing, and IT Consulting

Permanent Full Stack Engineer | Ctrip | Shanghai, China | June 2013 - February 2015

Responsibilities:

- Completed various Ctrip projects, including international and domestic air ticketing, ticket orders, train ticketing, strategy projects, and surrounding tour projects

Achievements:

- Worked in the company's framework team, significantly improving codebase and framework development skills
- Developed the habit of reading high-quality source code, applying design patterns, adhering to design principles, and writing highly readable and concise code
- Learned to effectively combine business and framework principles
